

TAILORED 1 DAY WORKSHOPS

Radio Frequency IDentification (RFID)

Get the whole picture on Radio Frequency IDentification (RFID) in a workshop that is specifically tailored for your organisation

This informative and interactive educational workshop will give your team the knowledge and insight to make informed choices regarding the merit, benefits and opportunities of using RFID.

A question often asked - *Is RFID really worth considering?* There's a lot more to RFID than just market hype. We offer independent training and education in relation to RFID.

The time is right to exploit RFID technology: the standards will soon be in place globally, the technology is proven in practice and the costs are improving all the time

Gain an understanding of what RFID is, learn about active versus passive tags, low frequency to microwave, compliance issues, the realities of RFID, options, capabilities and limitations of the technology. Most importantly, let us walk you through the minefield of information flying around in the marketplace and obtain the facts through a tailored 1 day workshop that delivers executive RFID education from an independent trusted source.

- Provides you with a fundamental understanding of all aspects of RFID in 1 day
- Hands on, interactive and educational
- An impartial and intelligent vendor neutral environment
- Allows you to make informed choices and decisions
- Tailored specifically for your business and industry
- Designed for companies planning to engage in RFID
- Many practical examples and applications shared
- Obtain answers to your specific questions and scenarios
- Helping you to develop a business case, undertake a feasibility study, needs analysis, evaluate vendors, determine your return on investment, launch a pilot project and plan a successful RFID deployment
- Obtain a written report based on the workshop findings

APICS offers your organisation a unique and dynamic 1 day tailored workshop. This workshop is for Australian companies facilitated by independent professionals who clearly understand the Australian marketplace, the broader industry landscape and how to utilise RFID for a best practice outcome.

We offer a wealth of knowledge and expertise in relation to RFID. Our workshop facilitators have extensive global experience with this technology from a training, education, strategic advice, technical, operational, engineering, programming and project management perspective.

We encourage you to contact us today to book your APICS RFID Workshop.
