

Additional Logistics Delays

We have been advised by multiple vendors that there has been further delays within the supply chain. In order for UMD to receive stock before the end of the year, we highly recommend placing your orders for distribution by the end of September, for stock that isn't already on distribution shelves.

Due to the frequently changing circumstances of the current pandemic, receiving orders by this period may not be guaranteed, however UMD will continue to communicate and work closely with our partners and suppliers to effectively ensure the timelines are met to minimise order disruptions.
