

# Managed Mobile Platform (MMP)

*Secure, cost effective and hosted communications*

## SIMPLE

Easy to use – avoids complex project set up, configuration and support. Ready to use in hours.

## SMART

Tracks and records all messages for proof of receipt and potential audit. Builds confidence, trust and dependence in users.

## RELIABLE

Eliminates the risks and burden of managing phone software and data. Users are visible, managed and available.

For organisations that need to streamline their communications and avoid the cost, time and risk in connecting people to information.

[www.wirelessworx.com.au](http://www.wirelessworx.com.au)

- **Quick start** to implementing data collect and communications across multiple sites and users
- **Connect workers and data** using mobile devices, desktops and automated data capture equipment
- **Secure** all forms of communication: messaging, file transfer, data collect and document distribution
- **Improve reliability and lower costs** to meet requirements for track and trace applications using low cost, easy to use software.

Point of Activity data capture, tracking and communications solution that cuts out the cost and complexity.

Companies want a simple yet effective way to capture and communicate information in automating work processes. Leave the complexity and reporting to existing ERP systems.

Users are driving the need for less complexity and together with the right automated data collect equipment, work processes can dramatically improve accuracy, speed and visibility without high project costs.

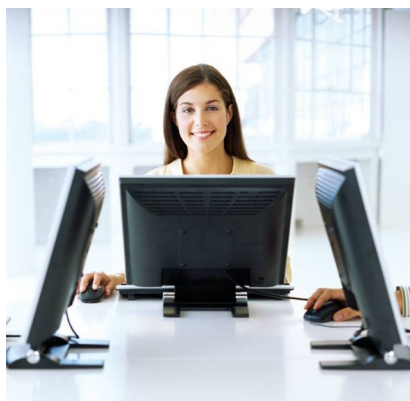

Using MMP, projects can get up and running in days not months!

MMP integrates and extends to your existing IT systems to give users access to information and a hosted service to manage all data capture, movement and integrity.

Authentication and security are built in through our efficient communications protocol and components.

All activities, users and movements are date/time stamped and captured and recorded using our web based server.

# Managed Mobile Platform - Benefits

**Secure connects** desktop and mobile data collect functions to a central management system.

MMP give you **administration controls, user registration and messaging management capabilities** so you can define, deploy, use and enhance the way you want to communicate.

**Dramatically lower costs** - messaging less than 1 cent per message  
- broadcast to a range of devices at a single message cost  
- send images, files and documents at less than 3 cents per message!

"MMP provides us best of all worlds: instant messaging, visibility of all users and lower communications costs. We have learned how to make this work in empowering people to act, identify requirements and communicate! We can move with confidence that we are in control of our mobile communications."

IT Director

## Use Cases

- Add real time, guaranteed messaging to ensure notifications, safety instructions and urgent instructions are actioned.
- Automated job tasks and records – time and attendance, job quotes, track and trace applications
- Improve and automate work group communications for transport, security, construction, government, health care, professional and field services
- Confirm priorities and respond quicker to customers with visibility of all users and activities
- Automatically send pictures, files and data captured when and where appropriate and highlights exceptions or mistakes
- Users build confidence, trust and reliance on a system they know is easy to use and works reliably.

### MMP 2.0 AVAILABLE NOW

Hosted Solution  
Easy Installation and Setup  
No maintenance required  
Designed for integration  
Built in security  
Administration tools  
Single device interface

1/200 Wellington Road  
Clayton, Victoria 3124  
Australia  
Phone 61 3 9582 7000

### ROBUST

End to end messaging software with device management, remote diagnostics and tools

### COST EFFECTIVE

Security, compression and data optimization built in that will significantly lower your bills.

### COMPLIANCE

Track and record instructions and activities to protect and empower your business

### HIGH IMPACT

Send messages that people know are important and will be acted upon
