- **UMD USB Cash Drawers**
- **Application Note 140 – UMD Cash Drawer Selection Guide (attached)**

UMD is pleased to release the UMD "U" Series of USB Cash Drawers. These cash drawers consist of the following range of UMD drawers with an inbuilt USB Trigger Module for convenience and ease of use (The USB interface is based on the UMD Model 317B USB External Trigger Module).

The USB Module is built into the rear of the drawer and connects to the computer as a USB Virtual Serial Com Port for easy, safe and secure drawer control, either through your software or using a separate utility.

We have also attached an updated Application Note (140) cash drawer selection guide.
